TECHNICAL SKILLS

Programming Languages | Python, JavaScript ES6+, TypeScript, HTML, CSS, SQL
Front-End | React, Redux Toolkit, Next.js, TailwindCSS, DOM manipulation, Websockets
Back-End | Django, FastAPI, NodeJS, Express, PostgreSQL, MongoDB, MySQL
Technologies & Tools | Microsoft Azure, AWS, Docker, Kubernetes, Git, RESTful APIs, Microservices, Continuous Integration/Continuous Delivery (CI/CD), Test-driven development, Agile methodology, Relational database management, Object-oriented programming

PROFESSIONAL EXPERIENCE

Energy AI Solutions 2023-Present
Software Engineer / Dev-Ops Engineer | Las Vegas, NV (Remote)

- Engaged in regular client meetings to gather requirements, present progress updates, and refine project specifications, resulting in an acceleration of project timelines.
- Streamlined version control and feature integration with Git, reducing code conflicts and accelerating deployments across cross-functional teams.
- Managed client relationships through consistent and reliable communication, ensuring alignment on project goals and contributing to the timely delivery of milestones and overall project completion.

Client: Diagnoss | *Cloud & DevOps Engineer* 2024-Present

- Migrated cloud infrastructure from AWS to Azure, including storage, databases, secret management, and compute resources, resulting in reduced operational costs.
- Adapted and optimized existing frontend React and backend Django applications to seamlessly integrate with the Azure environment, enhancing system performance and reliability.
- Established Azure DevOps pipelines, ensuring robust CI/CD processes that automatically deploy updates whenever code is merged into the main branch, reducing deployment time and effort.
- Orchestrated multiple containers using Kubernetes to deploy a production-level web application on Microsoft Azure, enhancing scalability, reliability, and deployment efficiency.
- Deployed and configured a WordPress site on Azure VM using Linux CLI, showcasing full-stack cloud infrastructure setup.

Client: Headge Media | *Frontend/Full Stack Developer* 2023-Present

- Deployed a React application to Microsoft Azure App Services, ensuring seamless user accessibility via web browsers, resulting in enhanced overall user experience.
- Demonstrated expertise in utilizing React to architect and develop highly reusable, performant, and maintainable components for web applications, resulting in a decrease in maintenance efforts.

Academic Dermatology of Nevada 2021-2022
Medical Assistant | Las Vegas, NV

- Educated 25-30 patients daily by effectively explaining complex medical information to ensure the patient has a clear understanding of their conditions and treatment plans.
- Utilized exceptional interpersonal communication skills to establish rapport with diverse patients, ensuring a comfortable environment during visits and procedures, leading to improved patient satisfaction scores.

CERTIFICATES

Microsoft Certified: Azure AI Engineer Associate | *Credential ID: 348112989562ID3* 2025

EDUCATION

Hack Reactor Immersive Bootcamp | *Advanced Software Engineering Certificate* 2023
EMS Training Center of Southern Nevada | *Emergency Medical Technician Certificate* 2021
University of Nevada, Reno | *Bachelor of Science, Kinesiology* 2019
